

oxidoreductase activity, acting on paired donors, with incorporation or reduction of molecular oxygen

channel activity
passive transmembrane transporter activity
substrate-specific channel activity
ion channel activity
gated channel activity
ion gated channel activity
cation channel activity
peptidase regulator activity
peptidase inhibitor activity
voltage-gated ion channel activity
voltage-gated channel activity
monooxygenase activity
extracellular matrix structural constituent
ligand-gated ion channel activity
ligand-gated channel activity
neurotransmitter receptor activity
potassium channel activity
voltage-gated potassium channel activity
steroid hydroxylase activity
chloride channel activity
extracellular ligand-gated ion channel activity
GABA receptor activity
GABA-A receptor activity
T cell receptor binding
