

DNA-binding transcription repressor activity, RNA polymerase II-specific

transcription coregulator activity
small GTPase binding
enzyme activator activity
Ras GTPase binding
nucleoside-triphosphatase regulator activity
GTPase activity
GTPase regulator activity
GTPase activator activity
phosphatase binding
Rab GTPase binding
protein phosphatase binding
catalytic activity, acting on a tRNA
1-phosphatidylinositol-3-kinase regulator activity
phosphatidylinositol 3-kinase regulator activity
NAD+ ADP-ribosyltransferase activity
protein ADP-ribosylase activity
L-ascorbic acid binding
phosphatidic acid binding
I-SMAD binding
phosphatidylcholine transporter activity
